Temporary Rally in Prices in Wall Street, but Monday's Loss Was Not Recovered.

New York, Feb. 11.—The needs of uncovered short interests, which began to make itself felt even before yesterday's session of weakness was over, asserted seven before yesterday's Republic Steel Car.

Southern Pacific than a part of yesterday's declines, and the force of the demand was decidedly leasened at the higher stages of the rally and seemed exhausted in a final reaction. The market, in fact, became profoundly dull in the latter part of the day, and the volume of dealings of the day before shrunk to about the average of last week's dull trading.

Some of the rumors which were in circulation in the immediate neighborhood of the stock exchange yesterday looked somewhat absurd in the more sober atmosphere of overnight consideration, the news publications practically ignoring them by reason of their unauthentic character. A covering movement by the bears was a natural consequence of these conditions. There was at the same time a cessation of pressure to sell which looked like liquidation yesterday, and was pressed with some urgency. The technical condition of the market was so far altered that unfavorable developments were withaut effect in checking the tendency toward recovery. Sentiment on the industrial outlook was somewhat cheered by quite a variety of reports of re-

change. There came a report also that the Pennsylvania railroad had 35 per cent of its equipment idle. Pennsylvania did not share in the general strength of the market, but this was partly accounted for by the belief that sales were being made of the stock against purchases of Reading through the same firm. The Rock Island securities also showed some unfortunate eftical locally at \$3.65@3.75.

Spelter was unchanged at £20 12s 6d in London and at \$4.65@4.75 locally.

Iron was unchanged to 3d higher in the English market, with standard foundry quoted at 47s 1d; Cleveland warrants at 48s 4½d. Locally no change was reported in northern iron, but southern grades were nominally easier; No. 1 foundry northern, \$18.25@18.75; No. 2, \$17.75@18.25; No. 1 southern and No. 1 southern soft, \$17.75@18.25. fect of the heavy cut in earnings reflected by the December report. The decline in gross earnings with the tide of operating expenses still rising seemed common to all branches of this extensive system, the net result of all lines showing a decrease from Decemextensive system, the net result of all lines showing a decrease from December of 1906 of \$1,140,096, or 52 per cent. For the six months from July 1 there is shown a shrinkage in the net returns of \$3,215,695, or upward of 20 per cent. Their ability to secure it may be of farreaching importance in setting the period of renewed productive activity by numerous industries. The holiday tomorrow was an influence toward curtailment of activity in stocks. A brief selling movement at the end of the day made rapid inroads on the earlier.

by quite a variety of reports of resumption of work by factories which have been closed down by reason of the diminished demand for their products. These reports were mixed, however, with others of fresh reduction of working force in some lines, as for example, the reported intention of the American Car & Foundry company to shut down plants in various states, employing 15,000 men.

The company's stock advanced a point in the price at the stock exchange. There came a report also that the Pennsylvania railroad had 35 per

GRAIN AND PROVISIONS.

GRAIN AND PROVISIONS.

Chicago, Feb. 11.—The wheat market was weak all day, although a steadier tone developed late in the session on buying. based on reports of sales here of considerable cash wheat to the interior millers. The principal weakening influence was a decline of more than 1 penny at Liverpool, due, it was said, to liberal offerings from Argentina. An increase of 2,106,000 bushels in the world's visible supply, as shown by Bradstreet's, and a heavy movement in the northwest, were added bearish factors. Selling at the start was general and the market received little support until May had declined to 94%c, which is within ½c of the low record for that delivery. The principal demand throughout the day came from shorts, whose purchases caused several slight rallies. The market closed weak. May opened ¾@½c to 1½c lower, at 95%c to 96c, sold off at 94%c and closed at 95%c. Clearances of wheat and flour were equal to 7,000 bushels. Primary receipts were 513,000 bushels, compared with a holiday last year. Minneapolis, Duluth and Chicago reported receipts of 418 cars, against 325 cars last week and a holiday a year 36.

ago.

Corn was affected by the break in wheat, sentiment being bearish all day. Several of the leading commission houses were free sellers and there was also selling by small holders. Primary receipts were somewhat larger than for the corresponding day last week, but local arrivals were light. The market closed weak. May opened a shade to 14,0% clower, at 614c to 614c, sold off to 60% and closed at 614c. Local receipts were 372 cars, 9 of contract grade.

Oats were weak in symmathy with what cars. 9 of contract grade.

Oats were weak in sympathy with wheat and corn. Cash interests were the principal sellers, but the volume of business was not large. May opened 3c lower, at 5314c, sold between 53@53%c and closed at 5314@5334c. Local receipts were 27 cars.

A 5c advance in live hogs had a tendency to offset the slump in grain prices as an influence on provisions, the market being quite steady all day. There was a fairly active demand from investors. At the close May pork was off 5c, at \$11.90. Lard was also off 5c, at \$7.424@7.45. Ribs were a shade higher, at \$6.5212.
